

Emergency Room InternTM

Read Me First!

If after installation, you get an error that says, "Unable to initialize sound settings" when trying to start the game after installation, please do the following:

1. Uninstall the game
2. Verify your sound card settings.

To find your sound card settings:

1. Click Start. Select Settings.
2. Select Control Panel.
3. Double-click System.
4. Select the Device Manager tab.
5. Double-click Sound, Video and game controllers.
6. Double-click the name of your sound card.
7. Click the Resources tab. This will display your sound card settings. Write down your Input/Output range (PORT), Direct Memory Access (DMA), and Interrupt Request (IRQ).

Once you have verified your sound card settings, Reinstall the game from the MS-DOS prompt within Windows 95 by doing the following:

1. Click Start. Select Programs.
2. Select MS-DOS prompt.
3. Type in, D:\install (ENTER). (where D: is your CD-ROM drive)
4. Follow the prompts.
5. Highlight sound card and then (ENTER).
6. Click the Select Digital button and then (ENTER).
7. Choose your sound card from the Digital Device list.

Note: If your sound card isn't listed, you can usually choose any of the sound blaster cards. Be sure and test your setting to make sure it is correct. You don't need to make a MIDI selection as Emergency Room Intern doesn't use MIDI.
